

V-Line

Maximize and Improve Interface Efficiency

With V-Line, your business gets Layer 2 point-to-point connectivity between your locations while receiving the flexibility to support multiple applications via a single multiplexed port.

Reduce costs and increase data capabilities

V-Line reduces your costs by lowering overhead associated with managing multiple ports on your network. Also, V-Line allows you to support multiple applications over a single interface and extends the shelf life of your investment by leveraging your existing equipment ports.

Solutions-based benefits:

- + Simplified, single connection to your premise equipment
- + Security of Ethernet Virtual Connections (EVC)
- + Optical handoff available for all speeds (optional)
- + Contracted bandwidth up to 10GB*

Experience the ease of Metro Ethernet and our 100% fiber-optic network

-  **Unsurpassed reliability** – Our high-performance fiber-to-the-premises network architecture protects your critical data and provides superior availability and resiliency.
-  **Easy scalability** – It's easy to meet your current and future data needs. As your business grows, a simple software change is all it takes to upgrade to up to 1Gb or up to 10Gb with little or no downtime.
-  **Valuable security** – We protect and segment all customer traffic on our network.
-  **True simplicity** – Our seamless installation and Customer Care make it easier to manage your network.
